

IN THE ABSTRACT

Please delete the original Abstract sheet page 20 in its entirety and insert therefor:

--ABSTRACT OF THE DISCLOSURE

A rotating electric machine including a stator and a rotor. The stator includes a core of a magnetizable material and a winding. The rotor rotates in relation to the stator with one degree of freedom. The stator includes a cup-shaped cavity surrounding the rotor. The cavity is limited by a rotational surface which is formed by a line which rotates around an axis and where the line is partly arched.--

REMARKS

Favorable consideration of this application, as presently amended, is respectfully requested.

The present Preliminary Amendment is submitted to place the above-identified application in more proper format under United States practice. By the present Preliminary Amendment the claims have been amended to no longer recite any reference numerals or multiple dependencies. The Abstract has also been amended by the present response to no longer recite any legal phraseology or reference numerals.
